1. COMPANY OVERVIEW

Since 1996, the company earned a reputation for integrity, quality, service, and attention to progress in detail. The company has grown from Design, Construction, and Oilfield services into one of UAE's most reputed Engineering & Contracting companies.

2016, Rebus has become a Project Closeout expert specializing in Airports, Nuclear Power Plant, Malls, and Commercial Buildings. Currently we are assigned in ORAT – (Operation Readiness Activation Terminal) Management and Construction Management to the main contractor in Abu Dhabi International Airport.

The team comprises a select group of experienced professionals working in several areas of Project Management. These areas include Design review, Specification Preparation & Review, Value Engineering, Procurement Processing, Contract Administration, Planning, Construction, Tenant Coordination, Project Closeout Management, and Post Construction Management Services.

Francis Christy Boy, CEO & MD has built his reputation in 30 years extensive experience and successful completions in project delivery. Francis led the team in the Dubai Mall, Barakah Nuclear Power Plant, Dubai International Airport, Abu Dhabi International Airport, Forsan Central Mall, and many other projects.

The company provides Project Management Services to international standards. Rebus's unique Project Management software tool “**CloseoutSoft**”-A Software Application for Construction through to Project Closeout has been developed to provide client management with project status at all levels.

Rebus offers a systematic and meticulous construction process that would guarantee you solid and satisfying results. In line with each project’s unique needs, they will tailor their approach to help you find the best process to meet your goals.

WE COMPLETE THE INCOMPLETE & MANAGE PROJECT HANDOVER

OUR VISION

To be one of the top 10 preferred and most trusted project management services providers in the UAE.

OUR MISSION

We will promote and implement the latest industry trends in our projects to provide our clients with the highest quality and sustainability. Our Enthusiastic **“We Complete the Incomplete”** approach in building positive long-term relationships and partnerships.

STRATEGY

Execute projects utilizing proactive management skills enables Close out of Projects in timely manner using Rebus closeout methodology.

CORE VALUES

- Integrity
- Courage
- Cost effective. Timeliness
- Reliability
- Dynamic PM Procedures

QUALITY POLICY STATEMENT

Rebus is committed to achieve and sustain excellence in its strategy & services business through an established Quality Management Studies.

Everyone at Rebus is responsible and accountable for fully satisfying our customers as per contractual, statutory and regulatory requirements with best in services.

QUALITY OBJECTIVES

- ✓ Build a mutually rewarding relationships with our customers, ensuring their long-term success through understanding of their needs and expectations.
- ✓ Achieve our commitments in our Core Values-Integrity, Courage, Cost effective, Time and Reliability.
- ✓ Drive Continual improvements and innovation based on efficient business processes, well defined measurements, best practices and customer surveys.

HEALTH, SAFETY & ENVIRONMENT (HSE) POLICY

We at Rebus are committed to provide safe & healthy workplace and to take adequate measures to prevent Environmental pollution for its activities and services as reasonably practical. To prevent any untoward incidents, accident or ill-health to, Rebus, Contractors and other stakeholders' employees, Rebus top Management recognize HSE management as a fundamental priority for sustainable organizational growth.

4. AREAS OF EXPERTISE

CloseoutSoft

We manage Projects with Rebus CloseoutSoft-A Software Application for Construction through to Project Closeout. Rebus CloseoutSoft-A is designed to facilitate an auditable & accountable Project Completion and to assist Client/Consultant/Contractor Manager's in the Progress Monitoring. This leads to project Completion & certification in a highly professional with the following features.

- All projects' forms are digital.
- Progress Updating, monitoring and Activity prioritizing.
- Built in QA/QC Inspection process & procedures.
- Built in Project Handover and Project closeout Process & procedures.
- PDF Annotation for progress updating in the drawings.
- Complete Document Management System
- Paperless Submission Process
- Auto Generated Asset Registering Management
- Budget monitoring in each BOQ item basis and Progress monitoring in each BOQ
- Monitoring Variations claims and its Work progress.
- Scanning, maintaining all submission history with complete documents such as technical submittals, Material submittals, Drawings, Deliverables, etc
- It provides your management with accurate project Progress information and comprehensive reporting.
- CloseoutSoft enables efficient Updating and Monitoring of Construction progress with an unprecedented level of accuracy.
- T & C Progress, System Functionality Readiness which leads to System Hand over
- Readiness for Client occupancies and Facility Handover
- Deliverables Management
- Snagging & De-snagging Management
- Easy to handle all levels of persons.
- Effective Project communication and notification to mobiles & through e-mails

Project Administration & Communication

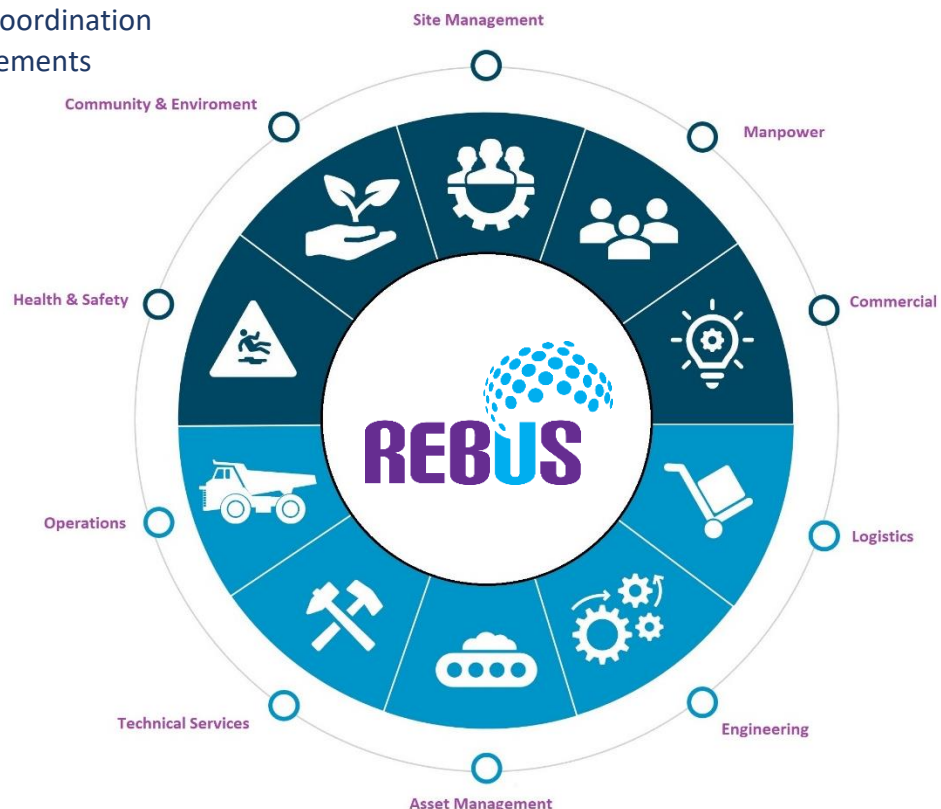

- Effective protocol of communication
- Authorization procedures
- Responsibility Matrix
- Flow charts
- Forms / Reports / Registers
- Paper & Electronic Filing
- Dash Boards

Scheduling & Progress Monitoring

- WBS / Master Schedule
- Design Schedule
- Look ahead Schedules.
- Key Milestones
- Packaging Strategy
- Construction Schedule
- Schedule Updates
- Variance Reports
- Payments management

Design Management / Value Management

- Design Stages & Design Coordination
- Local Authorities' Requirements
- Procurement Strategies
- Value Engineering
- Change Management
- QA/QC Procedures
- Modelling

Tendering & Pre-construction Activities

- Procurement Plan
- Prequalification / Long List – Short List
- Tender Documents
- Tender Queries
- Scoring System & Tender Report
- Form of Contracts
- LOI – LOA
- Contract Documents

Budgeting, Cost & Change Management

- Budgeting & Cost Plans
- Value Engineering Updates
- Cash Flow Forecasts
- Pre-Tender Estimate
- Payment Administration
- Tender Evaluation
- Cost Reports
- Final Account

Claims Management

- Claim Avoidance Strategy
- Claim Notices
- Detailed Particulars
- Delay Analysis
- Contract Compliance
- Mediation
- Arbitration Assistance

Tenant Space Turnover Management

Overall coordination with Employer, Project Management team, Design Consultant, Contractors and Tenants to assure Tenant Pre-occupancy Readiness in line with Construction Schedule and Tenant Occupancy as per Mall Opening Schedule by using CloseoutSoft- A software application Space /Systems Operational Readiness monitoring.

- Shell & Core Readiness
 - Architecture / Civil / Structure
 - MEP Systems & IT / ELV Systems
- Tenant Coordination
- Retail Delivery Documents
 - Employer's Tenant Manual including Design Criteria, Conditions of Premises (COP) and Site conditions documents ensuring there is no gap between these documents and Project Design, etc.
 - General Layout Plan for retail levels clearly showing retail units of all sizes and types.
 - Update LOD's (Lease Outline Drawings)
- Change management (TVR/LR)
- Tenant Space Readiness Management
- Commissioning, Completion and Handover
- Manuals, Warranties, End user training
- As-built
- Partial Occupancy
- Post Completion Report., etc

Interior Contracting Solutions

We provide interior contracting solutions for the advanced building construction sector of United Arab Emirates & the GCC Countries. The company is managed by qualified and experienced team of professional Engineers, Architects and supported by advanced machinery line up and skilled manpower. All covered by strict quality control procedures to deliver quality on time. We undertake all kinds of retail outlets

Construction Management

- Permits & NOCs
- Contract Commencement
- Construction Documents
- Site Plan, Mobilization & Logistics
- HSE & Security Procedures
- Insurances
- Project Execution Plan (PEP)
- Inspection & Testing Procedures
- QA/QC Plans & Procedures
- Change Management
- Procurement Management

Operational Readiness & Technical Handover

- Project Delivery Plan, describes actions to be taken, responsibility, start and end dates, applicable standards and constraints, resources, and steps to be taken.
- Diagram showing the flow of activities in a project delivery and dependencies among the activities
- Tool for planning and analyzing a continual improvement Step by step for the process flow
- Documentation for the Quality Management Systems
- Logs which include, Inspections requests, submittals logs, NCR log, etc.
- Communication to Management / Engineer / Client / Stakeholders
- Forms which we used for Project Delivery which is the measurable for close out progress

Project Closeout & Deliverables Managements

- Design and Develop project closeout requirement methodology.
- Plan and manage project closeout schedules.
- Operational readiness / Client occupancy requirement.
- System commissioning strategy and system handover
- Area readiness / Architectural finishing strategy.
- Project substantial completion readiness.
- Ensure smooth integration of engineering construction activities and transfer into operational phase for end-user occupancy.
- Operational Trial design / assistance as required and contracted.
- Occupancy management support.
- Reconciliation of project control logs with Engineer / Client log.
- Maintain Close out check list Matrix.
- Finalize the listing of all deliverables and submit for Engineer / Client approval.
- The Deliverables are defined as but not limited to:
 - Operation & Maintenance Manual
 - Training Manual
 - Demonstration & Training
 - Warranties
 - Extra Materials
 - Spare parts
 - Special tools
 - As built Drawing
 - Testing & commissioning Reports
 - System Hand Over
 - Keys

Commissioning Management Support

We believed Professional Commissioning Management System is vital to the success of any project and effective functional operation, thereby minimizing cost and ease of end user occupancy. Commissioning is well planned, documented and a systematic process of testing and analyzing to ensure facilities, building systems and perform safely. Meet design requirement, reduce operational cost and extended overall equipment life and System reliability.

- Planning in line with end user occupancy strategy and construction sequence / program Coordinated, multiservice commissioning method statement, logic networks and program
- Developed the Operational sequence and procurement strategy to start T & C for interim Handover.
- Control T & C record documentation / Test report
- Collation and generate multi-level reporting
- Witnessing T & C activities
- Validate T & C Records / FAT / SAT

Preventive & Reactive Maintenance

- Preparation of Preventive and Reactive maintenance procedure for daily, weekly, monthly, quarterly, semi-annually and annually
- Carryout Preventive and Reactive maintenance as per approved procedure /Manufacturer recommendations

Post Construction Activities / Project Closeout Activities

- Testing & Commissioning
- Final Area handover
- Final System Handover
- Project Deliverables Management
- Taking over Certificate
- Defects Liability Management
- Preventive & Reactive Maintenance
- Final Close out Report.

Project Completion & Certification

Demonstrate and maintain traceable and auditable project closeout requirement to get payment certificates in an Auditable & Accountable project closeout.

Managing O&M DLP to Contract

Every construction project has a "start-up" or "break-in" period, which begins after the project is substantially complete.

Substantial completion starts the legal and physical transition by end user / Client. This may occur even if some construction work remains to be done. Taking Over Certificate may be issued by the Engineer. Building systems and equipment are monitored, problems and warranty issues identified and repairs and modifications continue. The project is officially closed only after all "punch list" items are addressed.

We manage the following until Defect Liability Certificate is issued Handover.

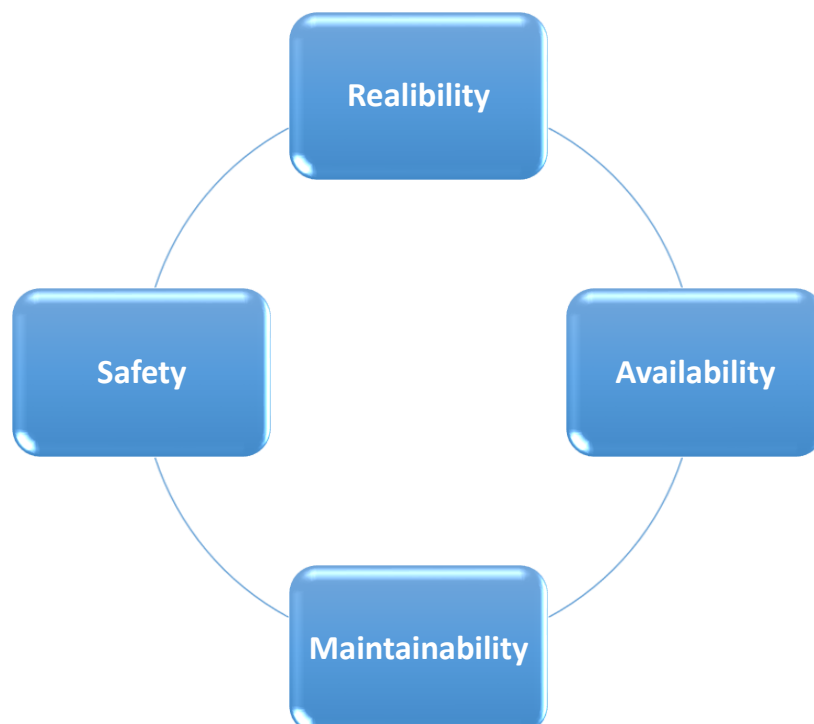

- Manage to complete outstanding works / Punch list issued by the Engineer in coordination with Taking Over Certificate (TOC) attachment.
- Strive to build effective communication with subcontractors / Engineer / Facility Management team / Client.
- Implement and manage defect management process to close notice of defects (NODs) issued by the end user during Defect Liability period.
- Make sure to receive all project deliverables such as Manuals, As built, demonstration training records, commissioning records, etc. are completed.
- Post Occupancy Audit will be carried out every six months during defect Liability period (DLP). These contain correct maintenance and custodial schedules and practices. Both satisfactory and poorly performing systems are documented for future reference and action.

Quality Management & Operational Audit

Rebus deploy a structured and systematic approach to ensure the System requirements related to RAMS (Reliability, Availability, Maintainability and Safety). Mainly System Assurance Drives Safety, System condition, operating condition & maintenance condition. Once the System is successfully installed, commissioned and operational, the focus of RAMS program changes to one of monitoring and sustaining operations.

- **Reliability** is a measure of the probability of an item to perform its required function under stated conditions for a specified period. During a contractual experimental period (three months), should failure occur an investigation is carried out to determine which Item is at fault. Following the Item's repair or replacement the experimental period is restarted.
- **Availability** is a measure of the Systems' function operationally. Failure outages and corrective maintenance periods, as well as preventative maintenance times are considered. Failure isolations and repairs, preventive maintenance periods and logistics support are included to the accumulated down time.
- **Maintainability** of a system/item to be retained in, or restored to, a specified condition. Personnel with specified skill levels, using prescribed procedures, are deployed at each prescribed level of maintenance.
- **Safety**, Inadequate reliability or false indications of components deemed critical safety item (CSI) directly jeopardize the health and safety of users.
